MEDIOBANCA SICAV: ALKIMIS ABSOLUTE I EURO CLASS ISIN: LU1031506550

This Fund is managed by Mediobanca Management Company SA

Objectives and Investment Policy

The Sub-Fund will provide capital growth and aim for a positive absolute return over the long term through long and short market exposure in OECD markets primarily in equities or related derivative contracts.

The Sub-Fund will have flexible net exposure to equity markets by taking long and short exposures on equities listed in OECD countries primarily through the use of transferable securities, linear financial derivatives "delta one" (i.e. contracts for difference (CFD) and swaps) and index futures.

The strategy will seek to gain market exposure exclusively on equities and equity related securities of companies that are listed in OECD countries.

The portfolio will contain a long exposure to a limited selection of securities considered as offering the greatest potential. Selection will comprise a mixture of "growth" and "value" stocks believed to have the potential to provide enhanced returns relative to the market. Growth stocks are those whose earnings are expected to grow faster than the average for the market, whereas value stocks, on the other hand, are inexpensive compared with the earnings or assets of the companies that issue them, often because they are in a mature or depressed industry, or because the company has suffered a setback.

Short exposure to single stocks may be gained if and when the manager believes they have a stretched valuation for which an imminent negative news flow is likely (e.g. sales or margins under unexpected pressure, likely to miss market forecasts, EPS revisions turning negative, unforeseen, acute risks on the balance sheet, cash flows disconnecting from P&L).

For hedging and for efficient management purposes the Sub-Fund may use all types of financial derivative instruments traded on a regulated market and/or over the counter (OTC) provided they are contracted with leading financial institutions specialized in this type of transactions.

The Sub-Fund may also hold on ancillary basis liquid assets.

The Sub-Fund has a structural long bias, but could be net short in specific market circumstances.

The maximum overall net short position of the fund would be about 20-25%.

The Sub-Fund may invest no more than 10% of its NAV in other UCITS/UCI.

The Sub-Fund is open-ended which means that it may, at any business day on the request of the shareholders, redeem its shares at prices based on the applicable Net Asset Value per Share.

Income arising from the Sub-Fund is being reinvested.

Recommendation: this Sub-Fund may not be appropriate for investors who plan to withdraw their money in the short-medium term (2-4 years).

The Net Asset Value ("**NAV**") of the Sub-Fund will be determined on each Business Day in Luxembourg ("**Valuation Day**"). The redemption requests will be closed at 4.00 p.m. CET ("**cut off time**") in Luxembourg on the Business Day preceding the relevant Valuation Day.

Minimum Initial Investment: None.

Minimum Subsequent Investment: None.

The Sub-Fund' share class is denominated in EUR.

The Fund is actively managed. The Fund is using ICE BofA Euro Treasury Bill Index (EGB0 Index) for the purpose of calculating the performance fee as indicated under the heading "Charges taken from the Fund under specific conditions" and in the past performance section below.

Risk and Reward Profile

This risk indicator is calculated using historical data, which cannot be used as a prediction for the future risk profile of the Sub-Fund. Therefore, the risk and reward category shown is not guaranteed to remain unchanged and the categorisation of the Sub-Fund may shift over time.

Even if the Sub-Fund is in the lowest risk class you can lose money, as no investments are entirely risk free.

At this time, the level of the risk and reward profile is equal to 5, due to the medium-high volatility of the markets and instruments in which the Sub-Fund invests.

The risk and reward profile does not take into consideration the following risks, which can affect the Fund:

- credit risk: which are linked to the debt securities the Sub-Fund invests in;
- operational risk: which may occur due to technical issues for example natural disasters, misunderstandings and fraud;
- counterparty risk: which may occur due to the fact that the fund might have exposure through contract with third parties;
- liquidity risk: which may occur due to the fact that the level of investments is made in financial instruments that could have a low level of liquidity in some extraordinary circumstances for example in the case of market crash and default of debt claims on issuers side.
